

CONTAINER SHIPPING ENVIRONMENTAL POLICY

The Container Shipping Environmental Policy applies to all locations and operations either conducted or under the control of Container Shipping and its entities.

Container Shipping provides our customers container feeder and NVOCC services within the Arabian Gulf and Indian Subcontinent.

Container Shipping shall ensure the prevention of pollution and is committed to the protection of the environment from impacts of its activities and operations.

Container Shipping is committed to the continual improvement of its environmental performance and reduction of the environmental impact of operations.

Container Shipping will operate in such a manner as to minimise the company's environmental impact while competitively providing feeder and NVOCC services.

Container Shipping will achieve its environmental goals through:

- meeting applicable compliance obligations to regulatory and other requirements related to its aspects and impacts;
- provide direction, training and supervision to enable staff to meet responsibilities;
- encourage our contractors and partners to demonstrate the same level of commitment;
- operate efficiently to minimise environmental impact;
- setting and reviewing of environmental performance objectives and targets;
- developing environmental programmes to achieve objectives and targets;
- monitor environmental performance to ensure compliance;
- identify and address opportunities for improvement;
- undertake compliance, review, and audit of the company's processes and performance;
